PROFESSIONAL SUMMARY

QA Automation Engineer with 6+ years in software delivery and 4+ years focused on test automation, building scalable frameworks in **Python, Selenium, Playwright and pytest** with the **Page Object Model**. Proven record of raising automated regression coverage and cutting regression cycle time by up to 60% through **CI/CD integration** (GitHub Actions, Azure DevOps, Jenkins). Experienced across **UI, API and cross-browser** testing in Agile, distributed, travel-tech environments.

CORE SKILLS

Test Automation: Selenium WebDriver, Playwright, pytest, Page Object Model (POM), Automation Framework Design, Data-Driven Testing, Cross-Browser Testing (Selenium Grid)

Programming: Python, JavaScript, SQL, Git / GitHub

API Testing: REST API Automation, Postman, requests, JSON schema validation

CI/CD & DevOps: GitHub Actions, Azure DevOps, Jenkins, Docker

Performance: JMeter, Load & Stress Testing

Cloud & Reporting: Azure, Allure / HTML Reports

Test Types: Functional, Regression, Integration, API, E2E, Cross-Browser

Process: SDLC, STLC, Defect Life Cycle, Agile, Scrum, Shift-Left Testing, BDD (Gherkin)

Tools: Jira, Azure DevOps, Confluence

PROFESSIONAL EXPERIENCE

FLYR Labs — Software QA Engineer II

Feb 2024 – Present · Travel / Airline Tech · Remote

- Increased automated regression coverage by **60%**, reaching **75%** of critical booking/pricing flows, by architecting a scalable Selenium + pytest framework with the Page Object Model.
- Cut regression cycle time by **60%** (from 1h to 24min) by parametrizing and parallelizing pytest suites, accelerating release cadence.
- Reduced production defect leakage by **15%** by integrating automated suites into CI/CD pipelines (GitHub Actions) that trigger regression on every pull request.
- Automated API validations for point-reload and voucher transactions, verifying status codes and response schemas against business rules.
- Accelerated defect resolution by **30%** by partnering with distributed engineering teams and enforcing a clear Defect Life Cycle in Jira.

Netactica — QA Analyst

Oct 2022 – Feb 2024 · Remote

- Executed manual and early automated test cases for web and API applications, contributing to test case design and the team's first automation efforts.
- Reduced defect leakage by **18%** by strengthening validation processes and traceability across the STLC.
- Streamlined defect tracking by managing the full defect life cycle in Azure DevOps, improving triage turnaround.

Transfiriendo S.A. — QA Analyst

Feb 2022 – Oct 2022 · Remote

- Reduced test execution time by **37%** by automating recurring UI and API test cases with Stela, a test automation tool.
- Increased requirement coverage by **22%** by designing test cases mapped directly to business requirements.
- Improved release confidence by executing regression and integration cycles with detailed, reproducible reporting.

Sigma Ingeniería S.A. — Development & Implementation Lead

Jun 2020 – Dec 2021

- Improved operational efficiency by **55%** by building internal tools and managing PostgreSQL databases for production systems.
- Reduced client onboarding time by **20%** by delivering technical support, documentation and training across 4 client accounts.
- Led 3-person implementation efforts, coordinating end-to-end delivery of system solutions.

EDUCATION

Technology in Systems Analysis and Programming — Completed, 2022

Systems Engineering — In progress (7th semester completed)
